

# REVERSE CAMERA & 5" MONITOR KIT

## SAFE REVERSING

Feel safer reversing with increased awareness and clearly see the obstacles behind you. These camera systems provides a clear bright extra eye in your vehicles blind spot and also allows for a better view of the traffic behind while driving. The rear view camera system not only makes working with a fleet vehicle easier, but it also greatly increases the overall safety of those around you.

The 5" monitor has a resolution of 640 x 480 for a sharp and clear image. 120 degree field of vision from each camera gives the driver a wide angled look.
