

RADIATOR SEED GUARD (FORD PX RANGER SPECIFIC)

PROTECTION AGAINST DEBRIS

Minecorp have developed a radiator guard specifically for the Ford PX Ranger. Manufactured from 2.5mm aluminium for a sturdy and durable barrier against objects flicked up from the ground below. The Guard features a two stage catch system that includes a lower barrier constructed of fine aluminium expander mesh and a second stage textile mesh protection the intercooler and radiator from finer particles entering and clogging the cooling fins. This system will keep your vehicles running longer and is a preventative measure for a common vehicle overheating problem.

PRODUCT NUMBER

- **M79070017/S**

FEATURES

TWO STAGE CATCH SYSTEM
