

# FORD RANGER 2015+ WHEEL CHOCK MOUNTING ADAPTOR - TUB BODY

## DAMAGE FREE MOUNTING FOR WHEEL CHOCK MOUNT

Wheel Chocks are a requirement within many builds, however these can be difficult to mount within a tub body. This generally requires drilling and nutserting or screwing into the tub, a time consuming process leaving permanent damage.

Fortunately, Minecorp has designed a solution without compromise to allow the rapid, damage free fitting of Minecorp Wheel Chock and Mounting Bracket Kits (M63000018). Made from tough yet light weight 2mm stainless steel, Minecorp's tub body wheel chock mounting adaptor sees the wheel chock bracket mounted in the passenger side rear corner of the tub, using the factory threads of the tie down points.

## QUALITY STAINLESS STEEL BRACKET, SIMPLE INSTALLATION

Installation is simple using existing factory mounting threads, meaning there is no need for any drilling, screwing, nutserting or damage whatsoever. This CNC laser cut and folded bracket allows the best solution for wheel chock mounting into a tub body with no compromise to convenience or resale value of your vehicle.

### PRODUCT NUMBER

- **M63000134/S**

### TO SUIT (NOT INCLUDED)

- **M63000018/S**

### FEATURES

- Allows quick, trouble free mounting to a tub body
- Simple, unobtrusive, damage free installation
- All required fasteners OEM or included
- 302 Stainless Steel for an aesthetically pleasing finish with excellent surface protection
- Easy access to wheel chocks when mounted
- Fitting instructions included

### PACKAGED WEIGHT

- 1.7KG

### NET WEIGHT

- 1.45KG

### FOR USE WITH THE FOLLOWING MODELS

- 2015+ 4x4 Crew (Dual) Cab (Tub Body)

### DRIVING VALUE & COMPLIANCE THROUGH QUALITY MODIFICATIONS
