

# TOYOTA HILUX 2015+ RADIO HANDSET MOUNT

## DAMAGE FREE MOUNTING FOR UHF/VHF MICROPHONE HANDSETS

UHF and VHF radios are ubiquitous in vehicles today, desired for both commercial and recreational applications. Unfortunately this more often than not results in irreparable damage to the dashboard and a handset mounted in a location that's difficult to access and impossible to reach.

Fortunately, Minecorp has designed a solution without compromise to allow fitting of a radio handset to the very latest Toyota Hilux. Made from tough yet light weight 2.5mm steel, Minecorps Radio Handset Mount sees the UHF/VHF microphone mounted unobtrusively, yet clearly visible and easily accessible below the drivers side corner of the windscreen.

## QUALITY POWDERCOATED BRACKET, SIMPLE INSTALLATION

Installation is simple using existing factory mounting threads, meaning there is no need for any drilling, screwing or dashboard damage whatsoever. This CNC laser cut, folded and powder coated bracket allows the best solution for microphone handset mounting with no compromise to convenience or resale value of your vehicle.

### PRODUCT NUMBER

- **M70000074/S**

### FITMENT TESTED WITH UNIDEN REMOTE MIC RADIOS

- **220-1145**
- **M70001017**
- **M70001020**

### FEATURES

- Simple, Unobtrusive, Damage Free Installation
- All required fasteners OEM or included
- Powder coated for an aesthetically please finish with excellent surface protection
- Easy access and viewing of the handset
- Fitting instructions included
