

# SWITCH MOUNTING PANEL ( HOLDEN COLORADO 2017+ )

## INTERNAL SWITCH MOUNTING PANEL

The Holden Colorado switch mounting panel is capable of accommodating a maximum of 3 or 5 switches in the utility version, and 3 switches & OEM Rear AC switch in the wagon variant. This panel is neatly mounted in to the dashboard, replacing the OE panel. The installation process is simple as it requires no cutting or drilling, it can also be easily removed with no visible markings remaining. The black powder coated finish ensures strength, durability and allows the switch panel to discreetly integrate with the vehicles interior.
