* Extensive range of trays to suit these and many other vehicles, please ask your Minecorp sales representative for more details.

LEVEL 1

Minecorp's Level 1 tray is constructed from general purpose aluminium with a raw finish. The tray includes a tubular aluminium headboard, internal load restraint rail, external rope tie rails and polypropylene mudguards as standard. A quick release hinging design is utilised on the drop sides and tail gate making tray access quick and effortless. A mesh load guard is available as an optional extra. A quality finish and practical features make this tray perfect for every day commercial use.

Features

- 01. Tubular headboard**
Aluminium CNC mandrel bent for consistency, strength and durability.
- 02. Quick release hinges**
Innovative functionality allows for simple fitment and removal of the drop sides.
- 03. Glass fibre reinforced nylon drop side and tailgate catches**
Meets exterior weathering requirements. Smooth design ensures no external sharp edges for safety. Anti-rattle design. Drop side & tailgate catch is over moulded with a steel insert for increased strength & durability.
- 04. Internal load restraint rail**
Ideal for loads that are lower than the drop sides to be restrained safely and securely within the tray. Allows for maximum down force to be applied to the load.
- 05. External rope tie rails**
The simple to use rope rail design makes securing your load a one man operation and makes roping loads easier. The segmented design provides space for easier access to fuel filler.
- 06. Rubber modified polypropylene mudguards**
Not as susceptible to permanent deformation and damage compared to steel mud guards. Made to withstand extreme temperatures and weather conditions in harsh environments. Smooth design ensures no external sharp edges for safety. Corrosion resistant.
- 07. Galvanised steel mounting system**
Provides a tough and durable frame for mounting the tray to the vehicles chassis.
- 08. Optional accessories available**
Including rated mesh load guard, ladder rack etc. Various accessories are available, please see page 5 for more detailed information.

LEVEL 2

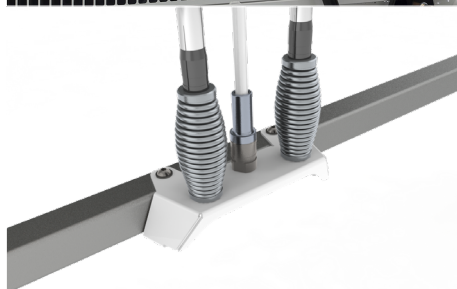

Minecorp's Level 2 tray is constructed from general purpose aluminium with a raw finish. The tray includes a tubular aluminium headboard, internal load restraint rail, external rope tie rails, laser cut mesh load guard, tail light and wiring guard and polypropylene mudguards as standard. A quick release hinging design is utilised on the drop sides and tail gate making tray access quick and effortless. The mesh load guard provides additional occupant protection against load intrusion. The tail light protector and wiring guard encompass the tail lights for a greater protection. Designed for industrial use in the civil and construction sectors with in built protection and load restraint features.

Features (As Level 1)

01. Tubular headboard
02. Quick release hinges
03. Glass fibre reinforced nylon drop side and tailgate catches
04. Internal load restraint rail
05. External rope tie rails
06. Galvanised steel mounting system
07. Rubber modified polypropylene mudguards
08. Optional accessories available

Additional Features

09. Laser cut mesh load guard with extruded aluminium frame
Laser cut, zinc plated steel mesh load guard provides protection to rear window. Provides maximum visibility.
10. Tail light and wiring protectors
The tail light bracket and surround provides added protection where it's needed

OPTIONAL EXTRAS

- 3 Point Access Ladder (M80000011/S)
- Vice and Mount (M80000113/S)
- Drop Side Post Aluminium (M80000062/S)
- Ladder Rack (M80000045)
- Beacon Mount to Suit Round Headboard (M80000066/S)
- Flag & Aerial Mount (M63000074/S, M63000075/S & M63000076/S)
- Undertray Battery Box (M67000105/S)
- Light Bar (M68001001/S)
- Spare Wheel Carrier (M80000012/S)

** Extensive range of optional extras besides the ones listed here, please ask your Minecorp sales representative for more details.*
