

MINECORP STEEL TRAYS

FOR FLEETS IN THE RESOURCE, CIVIL & COMMERCIAL INDUSTRIES

LEVEL 1

Minecorp's Level 1 Steel tray is a heavy duty steel tray with a galvanised finish. The tray features a tubular headboard, external rope tie rails and polypropylene mudguards. This tray is completed with zinc plated hardware components and 240mm high drop sides. A mesh load guard is available as an optional extra. This tray is perfect for every day commercial use.

Features

01. Tubular headboard
Aluminium CNC mandrel bent for consistency, strength and durability.
02. Glass fibre reinforced nylon drop side and tailgate catches
Meets exterior weathering requirements. Smooth design ensures no external sharp edges for safety. Anti-rattle design. Drop side & tailgate catch is over moulded with a steel insert for increased strength & durability.
03. External rope tie rails
The simple to use rope rail design makes securing your load a one man operation and makes roping loads easier. The segmented design provides space for easier access to fuel filler.
04. Rubber modified polypropylene mudguards
Not as susceptible to permanent deformation and damage compared to steel mud guards. Made to withstand extreme temperatures and weather conditions in harsh environments. Smooth design ensures no external sharp edges for safety. Corrosion resistant.
05. Galvanised steel mounting system
Provides a tough and durable frame for mounting the tray to the vehicles chassis.
06. Optional accessories available
Including rated mesh load guard, ladder rack etc. Various accessories are available, please see page 5 for more detailed information.

LEVEL 2

Minecorp's range of Level 2 Steel tray is a heavy duty steel tray with a galvanised finish. The tray features a tubular headboard, internal tie down points, laser cut mesh load guard, tailight and wiring guard, external rope tie rails and polypropylene mudguards. The steel tray features zinc plated hardware components and 240mm high, reinforced drop sides and tailgate. The laser cut mesh load guard provides additional occupant protection against load intrusion. The tail light protector and wiring guard encompass the tail lights for a greater protection. Designed for industrial use in the civil and commercial sectors.

Level 2 Single Cab Aluminium Tray Pictured

Features (As Level 1)

01. Tubular headboard
02. Glass fibre reinforced drop side and tailgate catches
03. External rope tie rails
04. Rubber modified polypropylene mudguards
05. Galvanised steel mounting system
06. Optional accessories available

Additional Features

07. Heavy duty internal tie down points
Multiple Inbuilt heavy duty floor tie down points rated to 500kg. Ideal for loads that are lower than the drop sides to be restrained safely and securely within the tray. Allows for maximum down force to be applied to the load.
08. Laser cut mesh load guard with extruded aluminium frame
Laser cut, zinc plated steel mesh load guard provides protection to rear window. Provides maximum visibility
09. Tail light and wiring protectors
The tail light bracket and surround provides added protection where it's needed

LEVEL 3

Minecorp's range of Level 3 Steel trays are a heavy duty, steel tray with a galvanised finish. The tray features a fabricated headboard hoop with laser cut mesh load guard, internal tie down points, taillight and wiring guard, external rope tie rails and polypropylene mudguards. The steel tray features zinc plated hardware components and reinforced short drop sides/ tailgate at 150mm in height for improved ergonomic loading of the tray. The AS4034 rated laser cut mesh load guard provides additional occupant protection against load intrusion. The tail light protector and wiring guard encompass the tail lights for a greater protection. The heavy duty tray combined with honeycomb section extruded aluminium drop sides are designed by Minecorp for use in harsh environments and are a must have for any work horse.

Features (As Level 1 & 2)

01. External rope tie rails
02. Rubber modified polypropylene mudguards
03. Tail light and wiring protectors
04. Galvanised steel mounting system
05. Optional accessories available

Additional Features

06. Fabricated headboard hoop
Fully welded box section steel headboard.
07. Adjustable over centre galvanised anti-rattle latches
Heavy duty anti-rattle over centre latches.
08. Extruded heavy duty aluminium drop sides with integrated load restraint points
150mm high heavy duty honeycomb section extruded aluminum drop sides provide an ergonomic working height. In built CNC machined internal load restraint rail for safe and secure load restraining.
09. Heavy duty checker plate steel floor
Galvanised and 3mm in thickness for durability. Ideal for every day use in harsh environments.
10. Mesh Load Guard
AS4034 rated, laser cut mesh load guard provides protection to rear window. Provides maximum visibility.
11. Optional colour coded painting
The headboard, hoop, external surface of the drop sides and body of the tray are all painted to colour match the vehicle for a professional looking finish.
12. Integrated heavy duty tie down points
Rated to 500Kg.
13. Drainage holes
Allow for easy wash down of the tray.
