Minecorp has engineered heavy duty vice mounts for the use on the rear of a vehicles tray. These Minecorp mounts are designed to be used with either the 125mm or 150mm vices to suit most off-site working conditions.

The mounts have an easy to use pivot motion with a spring loaded locking bolt for placing the vice in a safe working or safe stored position. When in the stored position minimal tray space is used and the vice winds up to clamp on the anti-vibration locking arm. When in the working position the vice can over hang the tray making for easier and safer working techniques as you can get close access to the vice. Manufactured from 4mm steel, zinc primed and powder coated for high strength and corrosion protection the Minecorp vice mounts are the solution to all off-site maintenance vehicles.

Key Features

- Constructed from 4mm mild steel
- Mount is powder coated (Silver) for superior protection
- Spring loaded locking bolt for working and stored position
- Anti-vibration vice locking arm
- Zinc plated high tensile bolts in fit kit
- Easy pivot motion allows for over hang for safer working techniques and minimal tray intrusion while stowed
