

INTERNAL DUAL BATTERY SYSTEMS

INTERNAL DUAL BATTERY AND MANAGEMENT SYSTEMS

Minecorp's latest dual battery & management system allows secure installation where room is available inside a Service Box or Canopy. This lightweight yet secure Battery Box is constructed from tough yet light weight aluminium, and allows for a complete turn key solution. This system is available with or without a 175A jump start facility (see the product table below), and also allows for easy compatibility with Minecorp 1000W inverter systems.

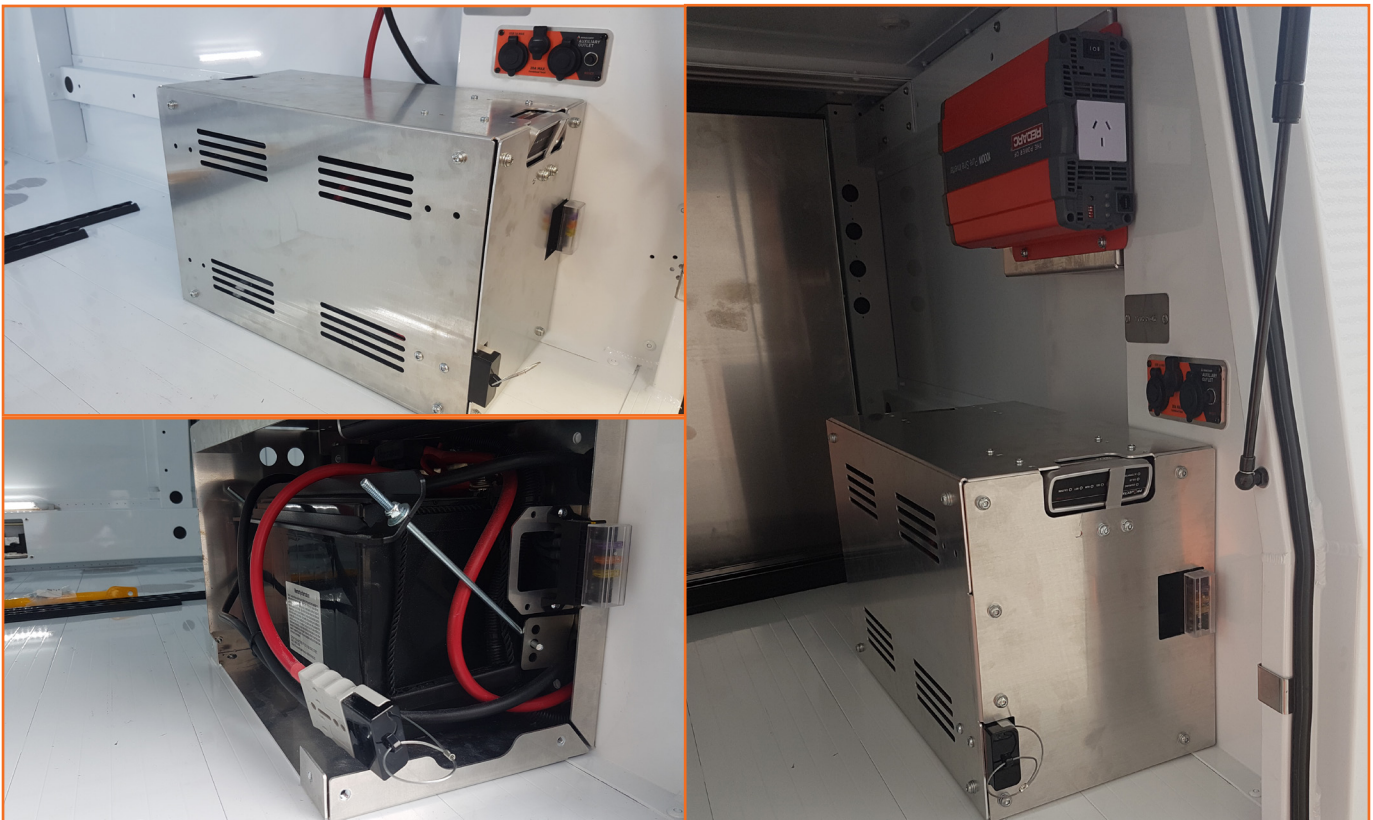

Currently all fitted options include Redarc 25A Battery Management System, Baintech Low Voltage Protection, 105Ah Deep Cycle Battery & 6 accessory fuse allocations. All electrical consumable items required are also included in the fitted cost (eg. wiring, lugs, major fuses, etc..)
