The Minecorp Hybrid Tray is the perfect solution for your fleet vehicle requirements, offering the strength of a steel tray while improving payload through the use of aluminium in certain areas. Designed and manufactured in Australia, the Hybrid Tray is designed for the varied demands of fleet vehicles, with a wide range of configurations and accessories.

With a streamlined and elegant appearance, the Hybrid Tray compliments a range of vehicles. The contrasting head-board mesh provides unobstructed views for the occupants, with excellent load protection, while the variety of tie-down points provide load security.

Robust

- Precision welded steel sub-frame for outstanding durability
- Vibration tested to stringent standards for a long service life in rough conditions
- Lightweight aluminium drop-sides
- Fully powdercoated for superior corrosion and wear protection

Increased Payload

- Alloy checker-plate flooring (5mm) for maximum load carrying capacity
- Integrated headboard tie-down points for increased flexibility

Flexible

- Internal tie-down points offer flexible options for securing your load
- Integrated undertray accessory mounting system allows for increased fleet flexibility, simplifying accessory installation
- Headboard accommodates multiple lighting configurations for any application

Accessories

- Underbody Toolboxes
- Undertray Drawer
- Undertray Water Tank
- Ladder Rack
- Lighting Solutions
- Replacement Parts Available
