The MCT range offers a Standard Tray or the fully integrated External Roll Bar Tray (MCT-ERB) with a certified roll over protective device engineered into the headboard of the tray. There is standard inclusion of load guard mesh, 4 rated M8 eyebolts, multiple M8 tie down locations, heavy duty hinges, full length rope rails and tail light stone guards for increased tail light protection. Available in dual or single cab for many makes and models and a wide range of accessories are available.

All Minecorp Load Guard's are tested to AS/NZS 4034.1:2008 for load impact, to protect the vehicle's occupants from loads up to 60KG. The Self Supporting Headboard mounts to the vehicle's tub body, creating a strong structure for the Load Guard to be secured to. All external accessories are powder coated for long lasting protection against harsh environments.
